AB - J59073600 The agent contains 24-methylenecycloartanol (MCA) as effective ingredient. MCA may be formulated into tablets, pills, powder, liquid, suspension, emulsion, granules, capsules, suppositories, injections, etc. together with fillers, excipients, binders, wetting agents, integrators, surface activating agents, lubricants, etc.

- In preparing tablets, excipients (e.g. lactose, sugar, starch, kaolin, crystalline cellulose, silica), binders (e.g. EtOH, PrOH, simple syrup, glucose, starch soln., gelatin soln., CMC, shellac, methylcellulose, K3PO4, polyvinylpyrrolidone), disintegrators (e.g. dry starch, Na alginate, agar dust, laminaria, NaHCO3, CaCO3, tween, Na laurylsulphate, stearic acid monoglyceride, starch, lactose), disintegration inhibitors (e.g. sugar, stearin, cacao butter, hydrogenated oil), absorption accelerators, (e.g. quat. ammonium salt, Na laurylsulphate), wetting agents (e.g. glycerin, starch), adsorbents (e.g. starch, lactose, kaolin, bentonite, colloidal silica) and lubricants (e.g. talc, stearate, boric acid powder, macrogol, solid polyethylene glycol) may be added.

- MCA is known as antiinflammatory agent and tranquiliser. 06A is useful in treatment of amenorrhea (grade 1), dysmenorrhea, ovulation disturbance, emmeniopathy, etc.(0/0)

IW - OVULATION INDUCE AGENT CONTAIN METHYLENE CYCLOARTENOL EFFECT INGREDIENT
IKW - OVULATION INDUCE AGENT CONTAIN METHYLENE CYCLOARTENOL EFFECT INGREDIENT
